

Module (jQuery Basic, Effects & Advanced) – 5

1. What is jQuery?

ANS: jQuery is a fast, small, and feature-rich JavaScript library. It makes things like HTML document traversal and manipulation, event handling, animation, and Ajax much simpler with an easy-to-use API that works across a multitude of browsers.

2. How to Apply CSS Using JQuery, How to Add Class and Remove Class in JQuery , JQuery Animation?

ANS: jQuery has several methods for CSS manipulation. We will look at the following methods: `addClass()` - Adds one or more classes to the selected elements. `removeClass()` - Removes one or more classes from the selected elements.

3. How to create slider with animation?

ANS: **Table of Contents:**

: Come up with a strategy for the slider.

1. Step 2: Update the background image in each slide.
2. Step 3: Update the text layers in each slide.
3. Step 4: Edit the button text and design in each slide.
4. Step 5: Edit the slider navigation.
